

## **Information on Presentations**

### **Oral Presentations**

The meeting room is equipped with the following audiovisual equipment: LDC projector (beamer), computer, overhead projector, two screens and laser pointer. Computer runs Windows and has Microsoft Power Point (Office XP) and Adobe Acrobat installed. All videos should be in \*.avi or \*.mpg format. Standard CD-R, CDRW, and memory sticks will be supported.

The presentations can be given by:

- PowerPoint or Acrobat files: Presentations should be brought on a CD or a memory stick. Presentations must be uploaded to the conference computer before the first session of the day.
- Overhead transparencies.

### **Poster Presentations**

Posters will be located in a specific room in front of the conference room.

- The dimension of the poster board is: 100 cm (width) × 200 cm (height). Recommended dimension for your poster is: 90 cm (width) × 150 cm (height).
- Place the title of your poster clearly at the top of the poster board in order to identify your poster easily. Indicate also the authors and their affiliations.
- Each poster should be located in the position numbered by the poster number (see the poster list).

## **Information on Symposium Proceedings**

The scientific contributions presented at the ISSC-2 will be published in a special issue of the *Advances in Space Research* journal, a recognized peer-review journal dedicated to space research. The special issue will be a single or double issue, depending on the amount of papers submitted, and fully dedicated to Space Climate. All submitted papers will be subjected to a normal peer-review by two reviewers. The volume will be edited by three guest editors (G. Maris, K. Mursula and I. Usoskin) and supervised by the Editor-in-chief M. Shea.

All submitted papers must meet the standards required of a research paper. Actually, the special issue will not be exactly equal to the Symposium proceedings, and the content of submitted papers may be different from that presented at the Symposium. Submitting a paper that has not been presented at the Symposium but is related to Space Climate, is also possible.

We aim for a very rapid publication schedule (see below). This implies strict deadlines, which have to be noted by all contributors. Papers that are too late to meet the January 2007 approval deadline will not be included in the special issue but can possibly be published later as normal, stand-alone papers in a regular ASR issue.

## SCHEDULE OF PUBLICATION

- 15 Sept. 2006**    **ABSTRACT DEADLINE**  
Submission deadline for the first notice of a paper which is intended to be submitted to the Proceedings. This notice should include the title, authors, and abstract of the paper, as well as names of 5 potential reviewers. Note that the abstract may be different from the contribution at the Symposium.
- 15 Oct. 2006**    **PAPER DEADLINE**  
Submission deadline of full papers to the Proceedings, prepared according to ASR requirements.
- 15 Dec. 2006**    Papers are expected to be appropriately revised after reviewing.
- 30 Jan. 2007**    **DEADLINE FOR FINAL APPROVAL**  
All papers that have been accepted by this date will be included in the special issue.
- April 2007**     The special issue will be first published electronically. Paper version will be published shortly thereafter.

### NOTES

**Note 1:** All submissions and correspondence on ISSC-2 papers (and abstracts) should be made to:

issc2@atoulu.fi (“at“ = @ coded for security reasons)

**Note 2:** Do not submit papers (or abstracts) directly to ASR!

**Note 3:** Page limit recommendations will be given after the Symposium. However, the nominal sizes will be close to 6 pages for original and 10 pages for review papers. The total limit for the special issue is 400 pages.

**Note 4:** You can find information on ASR format
